Summary

Highly motivated and dedicated professional with a passion for web development and a strong desire to excel as a Full Stack Web Developer. Completed the intensive Full Stack Web Developer program at UCSD Coding Bootcamp, gaining expertise in front-end and back-end development, along with the ability to create dynamic and user-friendly web applications. Possesses a solid foundation in programming languages, frameworks, and industry best practices, with a commitment to continuous learning and staying up-to-date with emerging technologies.

Responsibilities

-
1. Full-Stack Development: Developed proficiency in both front-end and back-end web development, mastering essential programming languages, frameworks, and tools such as HTML, CSS, JavaScript, React, Node.js, and Express.js. Acquired knowledge of databases and SQL, as well as RESTful API integration.
 2. Web Application Design: Acquired a deep understanding of user experience (UX) principles and applied them to create visually appealing and intuitive web interfaces. Developed wireframes and prototypes, ensuring seamless navigation, responsiveness, and accessibility across various devices.
 3. Collaborative Projects: Participated in team-based projects, collaborating with fellow learners to develop fully functional web applications from ideation to deployment. Collaborated on code repositories using version control systems like Git, fostering effective teamwork, and learning agile development practices.
 4. Problem Solving and Debugging: Developed strong problem-solving and debugging skills, utilizing industry-standard tools and

methodologies to identify and resolve issues in web applications. Gained experience in troubleshooting, optimizing performance, and enhancing functionality.

5. Continuous Learning: Demonstrated a commitment to lifelong learning by staying abreast of industry trends, emerging technologies, and best practices in web development. Actively engaged in self-study, online resources, and attending workshops to expand knowledge and refine skills.
6. Project Management: Employed project management principles, including task prioritization, time management, and effective communication, to ensure the timely and successful completion of individual and team projects. Managed project milestones, deadlines, and deliverables to meet or exceed expectations.
7. Testing and Quality Assurance: Employed various testing methodologies, including unit testing, integration testing, and user acceptance testing, to ensure the functionality, reliability, and security of web applications. Conducted thorough quality assurance checks to deliver high-quality, bug-free code.
8. Professional Networking: Engaged with industry professionals, attended tech meetups, and participated in networking events to build connections and expand professional opportunities within the web development community. Demonstrated a proactive approach to career development and seeking mentorship.

Education

University of California San Diego / Full-Stack Web Dev Cert

March 2023 - September 2023

As a participant in the Coding Bootcamp's Full-Stack Web Developer program at UCSD, I undertook an intensive and immersive learning experience focused on acquiring the skills and knowledge necessary to excel in the field of web development. Through this comprehensive program, I gained expertise in both front-end and back-end technologies, equipping me with the ability to design, develop, and deploy robust and user-friendly web applications.
